-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Receipt is acknowledged of the Applicant's Remarks, Claim Amendments, and Affidavits filed on 1/19/2006. Receipt is also acknowledged of Applicant's Information Disclosure Statement filed on 2/2/2006. It should be noted that this Application has been transferred from Examiner James Spear to Examiner David Vanik.

#### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of compounds of the following general formula:

Applicant is advised to specifically define and elect substituent groups for R<sup>1</sup> – R<sup>10</sup>. The examiner respectfully suggests that the double or single bonds of the above compound be defined as well. In short, the examiner respectfully

Art Unit: 1615

**requests that the Applicant define the structure of the above compound so that a search and examination may be undertaken.**

The species are independent or distinct because, as currently claimed, the structure comprises many different combinations of steroids with different reactivity, function, and structure. A search for each specific permutation of the above compound would place a serious burden on the examiner and the resources of the office.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 46-48, and 50 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2. This application contains claims directed to the following patentably distinct species of blood cell deficiency disorders chosen from the instant claims 6-14, 47, 52, 55:

**Applicant is advised to specifically select a species of blood cell deficiency disorder being treated by the disclosed compound. That is, the examiner respectfully requests that the Applicant specifically define a disorder and the compound used to treat said disorder so that a search and examination may be undertaken.**

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 46 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Art Unit: 1615

3. Applicant's agent, Daryl D. Muenchau, was contacted on 6/7/2006 concerning this election requirement. Mr. Muenchau was informed that, due to the complexity of the action, the action was submitted in writing.
